

INTRODUCTION

McLaren has always challenged beliefs and questioned the status quo. We built the first carbon fibre Formula 1™ race car. We were the first to bring that pioneering technology to the road with the McLaren F1. The McLaren P1™ was the world's first hybrid supercar. We spark quantum leaps in motorsport and supercar design that forever change the history of McLaren and motoring.

The McLaren Sports Series now pushes new boundaries by delivering McLaren DNA in sports cars. Like every McLaren road car, the Sports Series is built around an incredibly strong, stiff and light carbon fibre chassis, and combines superb performance and an unmatched driving experience with cossetting luxury and day-to-day usability.

The Sports Series is every inch a sports car, and every inch a true McLaren.
