720S COUPE

CONFIGURATION DATE: 15 MAY 2017

INTRODUCTION

The McLaren 720S embodies our relentless quest to push the limits of possibility. Lighter, stronger, faster. It's all of these and more. But how it makes you feel is altogether something else. Prepare to push the limits of what you thought possible in a supercar.

The most innovative supercar we've ever built the 720S is a masterpiece of advanced engineering, supreme beauty and breathtaking performance. Carbon fibre replaces the traditional metal roof to form a single shell – the Monocage II - and combining this with the new M840T engine, a 4.0-litre unit with twin scroll turbochargers and 16 injectors, creates a driving experience like no other. The design of the 720S presents a sleek, sculpted look, evoking fearsome power and ability. The shape is the next evolution of McLaren's modern design language that maintains the passion for beautiful simplicity.
