Brazilian Portuguese / On-Board Document	8AZ
Leather Seashell	RAT6

YOUR CONFIGURATION

CO2 emission: tbc g/km ; Fuel consumption: tbc mpg / tbc l/100km [#]

[1]

M

[1]The values of fuel consumptions, CO2 emissions and energy consumptions shown are determined according to the European Regulation (EC) 715/2007 in the version applicable at the time of type approval. The range shown considers optional equipment and the different size of wheels and tires available on the selected model and may vary during the configuration.

The values are already based on the new WLTP regulation and are translated back into NEDC-equivalent values in order to ensure the comparison between the vehicles. For the assessment of taxes or other duties based (at least inter alia) on CO2-emissions the CO2 values may differ to the values stated here.

The fuel efficiency label and VED banding shown is based on the current UK classification for new vehicle registrations (effective April 2017). For emission data, labelling and guidelines relating to your local market please contact your nearest sales outlet or from the relevant government authority in your region.

Further information about the official fuel consumption and the specific CO2 emission of new passenger cars can be taken out of the "Handbook of fuel consumption, the CO2 emission and power consumption of new passenger cars", which is available at all selling points and at <http://carfueldata.direct.gov.uk/>

[#] Emissions values for this production period are still to be confirmed. Please try again at a later date or contact your local sales outlet.
